CORDIMA CHIROPRACTIC CENTER

What's New at Cordima Chiropractic

A quick look at the care options available at our Somerville office.

8 WAYS WE HELP PATIENTS MOVE AND FEEL BETTER

1 More ways to address pain

Our office combines hands-on chiropractic care with additional options selected according to your examination and individual needs.

2 Non-surgical spinal decompression

Back-on-Trac is an option we may consider for certain neck or lower-back conditions. It is not appropriate for everyone.

3 Class 4 laser therapy

Laser therapy may be included in a care plan for selected musculoskeletal complaints. Results vary, and it is not a substitute for medical evaluation.

4 Focused knee care

Our Knee On Trac system is designed to provide controlled knee traction as part of an individualized knee-care program.

5 Shoulder and joint care

We also evaluate and manage selected shoulder, joint, and movement concerns with a mix of hands-on and supportive therapies.

6 Personalized rehabilitation

Movement guidance and home exercises can help support mobility and daily function when they are appropriate for your condition.

7 Auto injury evaluations

If you or someone you know is involved in a collision, we offer evaluations for neck, back, and related musculoskeletal symptoms.

8 Still personal, still local

Dr. Cordima and the team continue serving Somerville-area patients. Call to ask which services may be appropriate for you.

Curious which options might fit your needs?
